ENVIRONMENT POLICY

KeRRA's Environmental Policy is built on the commitments made in its Mission Statement and Core Value number seven: Environmental and Social Stewardship.

KeRRA will strive to improve environmental performance through:-

- Measuring the impacts of its activities on the environment and setting targets for ongoing improvement.
- Complying with the relevant environmental legal and regulatory requirements.
- Sustainable training and awareness for its staff and stakeholders on the Policy and environmental issues.
- Periodically reviewing performance and publishing these results appropriately.
- Influence, advice and co-operate with clients, stakeholders, partners, consultants, contractors and other interested parties in achieving best practices that will enhance sustainable development.
- Periodically develop rules and regulations for its staff and all stakeholders to manage and mitigate environmental impacts.

KeRRA will update this policy at least bi-annually in consultation with staff and other stakeholders.

Eng. Mwangi Mainigi, MBS, OGW

Director General
