

E – Performance Based Maintenance Contractors Course - 5 weeks

This training targets individual micro entrepreneurs who possess Secondary School academic qualification of the equivalent of grade D. The Routine maintenance Contractor will ideally be a one-man-Contractor. He or She will engage 15 – 30 workers depending on the length of the road.

The proposed training aims at providing the Contractors with the knowledge and skills required to carry out road maintenance operations based on agreed levels of service (**Performance**) and **basic business skills**

Entry:

Entry will be on invitation for prequalification in the adverts placed in the two National Newspapers as well as local public places like KeRRA Regional offices, District Officers, and Chiefs Camps

Requirements:

1. The individuals applying must have minimum of **KCSE grade D**, Additional technical training and proven business potential will be added advantage
2. The duration of training for the successful applicants will be **5 weeks** (3 weeks Classroom + 2 weeks for Practical training on a demonstration road.
3. The selected contractors will undergo intensive classroom and field training by Kenya Institute of Highways & Building Technology (KIHBT). Most of the training will be undertaken in Isiolo region. Only those contractors who complete the training course successfully will be considered by the Regional Tender Committees for carrying Performance Based Routine maintenance road works using labour-based methods
